## Work experience

### Trainee Developer May 2017 - Jul 2017

Danone Nutricia Research, Utrecht, Netherlands

Assisted in developing a robust application to store and analyze research labs data based on business needs.

### Software Developer Jan 2020 - Jul 2020

Orange, Bordeaux, France

Supported the team in developing software for managing desktop software licences across all Orange employees. Assisted in Software Development Life Cycle (SDLC) to analyze and enhance the code that improved product performance.

### Data Project Manager Jan 2021 - Jul 2022

OKINA, Dax, France

Managed all data projects and ensured smooth data communication that met quality standards and SOPs. Managed schedules, deadlines, risks, resources, and stakeholders to meet project needs and effective execution. Leveraged positive relationships with clients and stakeholders by providing outstanding customer service.

### FullStack Developer Sep 2022 - Jan 2023

IziUp, Remote

Designed, built, and tested a responsive online food ordering & products management platform per client specifications. Built a user-friendly website and performed website maintenance, patching, and up-gradation to meet business needs. Conducted tests and improved website design for clarity and effectiveness that enhanced user experience. Developed client app and admin app as well as conducted testing to resolve bugs & issues for improving functionality.

### FullStack Mobile Developer Jan 2020 - Dec 2022

Self Employed, Remote

Designed and built a social network app, "Chap" for iOS and Android. Tested, examined, and evaluated technical issues within applications to improve reliability and user interface.

## Education

### Telecom Engineering Master Degree Sep 2015 - Jul 2020

ENSEIRB-Matmeca, Bordeaux, France
